Dear Dr. Chu,

Thank you for reaching out. It is wonderful that you are in the process of developing a new program to include processing, use of LIS, specimen send-outs and waived testing. It would be a great program but I am not sure if HPMC would be ready for these type of training due to accessing hospital LIS and laboratory safety. I would be more than happy to support the idea and the plan for developing, but I cannot assure you that we will be able to accommodate the type of training. It is very helpful when the lab assistant/phlebotomist is good with computer systems and understand the type of tests and the specimen requirements for the specific test especially when to ask question or verify with physician of the order.

Warm Regards,
Angela
