

Cuesta College Aviation Maintenance Program Advisory Committee

October 31, 2022

Letter of Support – Aviation Maintenance Program Certificate

The Aviation Committee members were contacted via email to discuss the merit of adding three certificate programs within the Aviation Maintenance Training program at Cuesta:

Aviation Mechanic – General

Aviation Mechanic – Airframe

Aviation Mechanic – Powerplant

The Aviation Maintenance Technician program was also recommended to be modified to “Aviation Mechanic – Airframe & Powerplant.

The following members voiced support for the change:

Tomas Svitek – Stellar Exploration, Inc.

George Dom – ACI Jet

David Jensen – ACI Jet

Bill Borgsmiller – ACI Jet

Oscar Ramos – Cuesta College

Colin Judge – Luminary Aero

David Clark – Camp Roberts

Courtney Johnson – San Luis Obispo Airports

Melissa James – Reach Economic Development

Given that an overwhelming majority of members of the aviation committee support this change, this letter is to document the support of the aviation maintenance committee in favor of adding the above-mentioned certificates and changing the name of the Aviation Maintenance Technician program. It should be noted that none of the members voiced opposition.

Respectfully,

Ron Overacker, (Acting) Program Director
Cuesta College Aviation Maintenance Training Program
