The Los Angeles/Orange County Center of Excellence for Labor Market Research (COE) prepared this report to provide Los Angeles/Orange County regional labor market supply and demand data related to five occupations:

- Producers and directors (27-2012),
- Audio and video technicians (27-4011),
- Sound engineering technicians (27-4014),
- Camera operators, television, video, and film (27-4031), and
- Film and video editors (27-4032).

Middle-skill occupations typically require some postsecondary education, but less than a bachelor's degree.¹ This report is intended to help determine whether there is demand in the local labor market that is not being met by the supply from community college programs that align with the relevant occupations.

Based on the available data, there appears to be a supply gap in the region for the five occupations of interest. Although the majority of annual openings for the occupations in this report have entry-level wages that exceed the self-sufficiency standard wage in Los Angeles County, three of the five occupations typically require a bachelor's degree. **Due to some of the criteria being met, the COE endorses this proposed program.** Detailed reasons include:

¹ The COE classifies middle-skill jobs as the following:

All occupations that require an educational requirement of some college, associate degree or apprenticeship;

[•] All occupations that require a bachelor's degree, but also have more than one-third of their existing labor force with an educational attainment of some college or associate degree; or

[•] All occupations that require a high school diploma or equivalent or no formal education, but also require short- to long-term on-the-job training where multiple community colleges have existing programs.

Demand:

- Supply Gap Criteria Over the next five years, there is projected to be nearly 4,700 jobs available annually in the region due to new job growth and replacements, which is more than the 2,406 awards conferred annually by educational institutions in the region.
 - NOTE: The occupations included in this report encompass all types of filmmaking occupations, including digital filmmaking. Since there is no SOC code dedicated specifically to digital filmmaking, the demand data in Exhibit 1 is overstated.
- Living Wage Criteria In Los Angeles County, the majority (83%) of annual job openings for the five occupations have entry-level wages above the self-sufficiency standard hourly wage (\$18.10/hour).²
- Educational Criteria Within the LA/OC region, 78% of the annual job openings for the occupations of interest typically require a bachelor's degree.
 - National-level educational attainment data indicates between 19% and 38% of workers in the field have completed some college or an associate degree.

Supply:

- Between 2017 and 2020, **18 community colleges** in the LA/OC region issued awards in programs that have historically trained for the occupations of interest, conferring an average of **683 awards**.
- Between 2016 and 2019, non-community college institutions in the region conferred an average of 1,723 awards in relevant programs.

Page 2 | 9

² Self-Sufficiency Standard wage data was pulled from The Self-Sufficiency Standard Tool for California on 12/7/2021. For more information, visit: http://selfsufficiencystandard.org/california.

Occupational Demand

Exhibit 1 shows the five-year occupational demand projections for the five occupations of interest. In Los Angeles/Orange County, the number of jobs related to these occupations is projected to increase by 2% through 2025. There will be nearly 4,700 job openings per year through 2025 due to job growth and replacements.

NOTE: The occupations included in this report encompass all types of filmmaking occupations, including digital filmmaking. Since there is no SOC code dedicated specifically to digital filmmaking, the demand data in Exhibit 1 is overstated.

This report includes employment projection data by Emsi which uses EDD information. Emsi's projections are modeled on recorded (historical) employment figures and incorporate several underlying assumptions, including the assumption that the economy, during the projection period, will be at approximately full employment. To the extent that a recession or labor shock, such as the economic effects of COVID-19, can cause long-term structural change, it may impact the projections. At this time, it is not possible to quantify the full impact of COVID-19 on projections of industry and occupational employment. Therefore, the projections included in this report do not take the full impacts of COVID-19 into account.

Geography	2020 Jobs	2025 Jobs	2020-2025 Change	2020-2025 % Change	Annual Openings
Los Angeles	48 , 571	49,537	966	2%	4,420
Orange	2,800	2,878	78	3%	267
Total	51,370	52,416	1.046	2%	4,687

Exhibit 1: Occupational demand in Los Angeles and Orange Counties³

Wages

The labor market endorsement in this report considers the hourly wages for the five occupations in Los Angeles County, as they relate to the county's self-sufficiency standard wage. Orange County wages are included below in order to provide a complete analysis of the LA/OC region. Detailed wage information, by county, is included in Appendix A.

Los Angeles County — The majority (83%) of annual openings for the five occupations have entry-level wages <u>above</u> the self-sufficiency standard wage for one adult (\$18.10 in Los Angeles County). Typical entry-level hourly wages are in a range between \$17.16 and \$30.67. Experienced workers can expect to earn wages between \$44.16 and \$78.61, which are above the self-sufficiency standard wage estimate.

Orange County — The majority (61%) of annual openings for the five occupations have entry-level wages <u>below</u> the self-sufficiency standard wage for one adult (\$20.63 in Orange County). Typical entry-level hourly wages are in a range between \$14.74 and \$25.74. Experienced workers can expect to earn wages between \$41.35 and \$68.50, which are above the self-sufficiency standard wage estimate.

³ Five-year change represents new job additions to the workforce. Annual openings include new jobs and replacement jobs that result from retirements and separations.

Job Postings

Over the past 12 months, there have been 5,470 online job postings related to the five occupations of interest. The highest number of job postings were for video editor, producer, associate producer, videographer, and executive producer. The top skills were budgeting, scheduling, video editing, social media, and Adobe Photoshop. The top employers, by number of job postings, in the region were Amazon, Disney, and NBC.

It is important to note that the job postings data included in this section reflects online job postings listed in the past 12 months and does not yet demonstrate the full impact of COVID-19. While employers have generally posted fewer online job postings since the beginning of the pandemic, the long-term effects are currently unknown.

Educational Attainment

The Bureau of Labor Statistics (BLS) lists the following typical entry-level education levels for the occupations in this report:

- Bachelor's degree: producers and directors; camera operators, television, video, and film;
 and film and video editors
- Postsecondary non-degree award: Audio and video technicians; and sound engineering technicians

In the LA/OC region, the majority of annual job openings (78%) typically require a bachelor's degree. National-level educational attainment data indicates that between 19% and 38% of workers in the field have completed some college or an associate degree. Of the 39% of job postings listing a minimum education requirement in Los Angeles/Orange County, 27% (590) requested high school or vocational training, 4% (90) requested an associate degree, and 68% (1,469) requested a bachelor's degree.

Educational Supply

Community College Supply — Exhibit 2 shows the annual and three-year average number of awards conferred by community colleges in programs that have historically trained for the occupations of interest. The colleges with the most completions in the region are Saddleback and LA City. Over the past 12 months, there were 11 other related program recommendation requests from regional community colleges.

Non-Community College Supply — For a comprehensive regional supply analysis, it is important to consider the supply from other institutions in the region that may provide training programs for the occupations of interest. Exhibit 3 shows the annual and three-year average number of awards conferred by these institutions in programs crosswalked to the TOP in Exhibit 2. Due to different data collection periods, the most recent three-year period of available data is from 2016 to 2019. Between 2016 and 2019, non-community college institutions in the region conferred an average of 1,723 awards annually in related training programs.
