

Labor Market Assessment: 0505.00 – Business Administration

Business Administration (Associate Degree)

Los Angeles Center of Excellence, April 2022

Summary

Program Endorsement:	Endorsed: All Criteria Met <input type="checkbox"/>	Endorsed: Some Criteria Met <input checked="" type="checkbox"/>	Not Endorsed <input type="checkbox"/>
Program Endorsement Criteria			
Supply Gap:	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/> (see comments below)	
Living Wage: (Entry-Level, 25th)	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>	
Education:	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>	
Emerging Occupation(s)			
Yes <input type="checkbox"/>		No <input checked="" type="checkbox"/>	

The Los Angeles Center of Excellence for Labor Market Research (LA COE) prepared this report to provide regional labor market supply and demand data related to four middle-skill occupations:

- *General and operations managers (11-1021);*
- *Administrative services and facilities managers (11-3011);*
- *Industrial production managers (11-3051); and*
- *First-line supervisors of office and administrative support workers (43-1011).*

Middle-skill occupations typically require some postsecondary education, but less than a bachelor's degree.¹ Although three of the four occupations in this report typically require a bachelor's degree, they are considered middle-skill because approximately one-third of workers in the field have completed some college or an associate degree. This report is intended to help determine whether there is demand in the local labor market that is not being met by the supply from educational programs that align with the relevant occupations.

Based on the available data, there does not appear to be a supply gap in the region for the occupations of interest. However, the business programs summarized in this report are often general enough that they provide training for several occupations beyond those included in this report, so this supply/demand analysis report should not be the only factor considered for program endorsement in this case.

Although it is unlikely that community college students obtaining this award as their highest level of education will be qualified for many of these jobs, this program may provide an opportunity for students from related fields to upskill their existing business knowledge and skills set.

¹ The COE classifies middle-skill jobs as the following:

- All occupations that require an educational requirement of some college, associate degree or apprenticeship;
- All occupations that require a bachelor's degree, but also have more than one-third of their existing labor force with an educational attainment of some college or associate degree; or
- All occupations that require a high school diploma or equivalent or no formal education, but also require short- to long-term on-the-job training where multiple community colleges have existing programs.

In addition to all four occupations in this report having entry-level wages that exceed the self-sufficiency standard wage in both Los Angeles and Orange counties, between 29% and 40% of workers in the field have completed some college or an associate degree. **Due to some of the criteria being met, the LA COE endorses this program.** Detailed reasons include:

Demand:

- **Supply Gap Criteria** – Over the next five years, there is projected to be **15,567 jobs available annually** in the region due to retirements and workers leaving the field, **which is less than the 21,428 awards conferred annually** by educational institutions in the region.
 - However, over the past 12 months, there have been **43,832 online job postings related to the occupations of interest**. The highest number of job postings were for general managers, operations managers, office managers, managers, and operations supervisors.
- **Living Wage Criteria** – In Los Angeles County, all four occupations in this report have entry-level wages **above** the self-sufficiency standard wage (\$18.10/hour).²
- **Educational Criteria** – Within the LA/OC region, 61% of the annual job openings for the occupations studied in this report typically require a bachelor’s degree.
 - However, national-level educational attainment data indicates that **between 29% and 40% of workers in the field have completed some college or an associate degree**.

Supply:

- Between 2017 and 2020, **29 community colleges** in the LA/OC region issued awards in programs that have historically trained for the occupations of interest, conferring an average of **9,191 awards**.
- Between 2016 and 2019, non-community college institutions in the LA/OC region conferred an average of **12,237 awards in relevant programs**.

² Self-Sufficiency Standard wage data was pulled from The Self-Sufficiency Standard Tool for California. For more information, visit: <http://selfsufficiencystandard.org/california>.

Occupational Demand

Exhibit 1 shows the five-year occupational demand projections for the four occupations of interest. In the Los Angeles/Orange County region, the number of jobs related to these occupations is projected to decrease by 2% through 2025. However, there will be more than 15,500 job openings per year through 2025 due to retirements and workers leaving the field.

This report includes employment projection data by Emsi which uses EDD information. Emsi's projections are modeled on recorded (historical) employment figures and incorporate several underlying assumptions, including the assumption that the economy, during the projection period, will be at approximately full employment. To the extent that a recession or labor shock, such as the economic effects of COVID-19, can cause long-term structural change, it may impact the projections. At this time, it is not possible to quantify the full impact of COVID-19 on projections of industry and occupational employment. Therefore, the projections included in this report do not take the full impacts of COVID-19 into account.

Exhibit 1: Occupational demand in Los Angeles and Orange Counties³

Geography	2020 Jobs	2025 Jobs	2020-2025 Change	2020-2025 % Change	Annual Openings
Los Angeles	128,804	126,424	(2,380)	(2%)	11,180
Orange	50,106	49,722	(384)	(1%)	4,387
Total	178,910	176,146	(2,764)	(2%)	15,567

Wages

The labor market endorsement in this report considers the entry-level hourly wages for the occupations of interest in Los Angeles County, as they relate to the county's self-sufficiency standard wage. Orange County wages are included below in order to provide a complete analysis of the LA/OC region. Detailed wage information, by county, is included in Appendix A.

Los Angeles County – All four occupations in this report have entry-level wages above the self-sufficiency standard wage for one adult (\$18.10 in Los Angeles County). Typical entry-level hourly wages are in a range between \$22.94 and \$38.71; experienced workers can expect to earn wages between \$37.15 and \$88.18.

Orange County – All four occupations in this report have entry-level wages above the self-sufficiency standard wage for one adult (\$20.63 in Orange County). Typical entry-level hourly wages are in a range between \$22.92 and \$40.61; experienced workers can expect to earn wages between \$37.09 and \$87.97.

³ Five-year change represents new job additions to the workforce. Annual openings include new jobs and replacement jobs that result from retirements and separations.

Job Postings

Over the past 12 months, there have been 43,832 online job postings related to the occupations of interest. Exhibit 2 displays the number of job postings by occupation. The majority of job postings (49%) were for *general and operations managers*. The highest number of job postings were for general managers, operations managers, office managers, managers, and operations supervisors. The top skills were budgeting, scheduling, customer service, staff management, and operations management. The top employers, by number of job postings, in the region were Anthem Blue Cross, CVS Health, and University of California.

It is important to note that the job postings data included in this section reflects online job postings listed in the past 12 months and does not yet demonstrate the full impact of COVID-19. While employers have generally posted fewer online job postings since the beginning of the pandemic, the long-term effects are currently unknown.

Exhibit 2: Job postings by occupation (last 12 months)

Educational Attainment

The Bureau of Labor Statistics (BLS) lists the following typical entry-level education levels for the occupations in this report:

- **Bachelor's degree:** *General and operations managers (11-1021); Administrative services and facilities managers (11-3011); and Industrial production managers (11-3051)*
- **High school diploma or equivalent:** *First-line supervisors of office and administrative support workers (43-1011)*

In the LA/OC region, the majority of annual job openings (61%) typically require a bachelor's degree. However, national-level educational attainment data indicates that between 29% and 40% of workers in the field have completed some college or an associate degree.

Educational Supply

Community College Supply – Exhibit 3 shows the annual and three-year average number of awards conferred by community colleges in programs that have historically trained for the occupations of interest. The colleges with the most completions in the region are Coastline, Pasadena, and Cerritos.

Exhibit 3: Regional community college awards (certificates and degrees), 2017-2020

Non-Community College Supply – For a comprehensive regional supply analysis, it is important to consider the supply from other institutions in the region that may provide training programs for the occupations of interest. Exhibit 4 shows the annual and three-year average number of awards conferred in relevant programs. Due to different data collection periods, the most recent three-year period of available data is from 2016 to 2019. Between 2016 and 2019, non-community institutions in the region conferred an average of 12,237 awards in relevant training programs.

Exhibit 4: Regional non-community college awards, 2016-2019
