The Los Angeles/Orange County Center of Excellence for Labor Market Research (COE) prepared this report to provide Los Angeles/Orange County regional labor market supply and demand data related to four middle-skill occupations:

- Architectural and Civil Drafters (17-3011);
- Mechanical Drafters (17-3013);
- Industrial Engineering Technologists and Technicians (17-3026); and
- Mechanical Engineering Technologists and Technicians (17-3027)

Middle-skill occupations typically require some postsecondary education, but less than a bachelor’s degree.<sup>1</sup> This report is intended to help determine whether there is demand in the local labor market that is not being met by the supply from community college programs that align with the relevant occupations.

Based on the available data, there appears to be a supply gap for the occupations of interest. In addition to all four occupations having entry-level wages that exceed the self-sufficiency standard wage in both Los Angeles and Orange counties, the Bureau of Labor Statistics lists an associate degree as the typical entry-level education. **Therefore, due to all of the criteria being met, the COE endorses this proposed program.** Detailed reasons include:

---

<sup>1</sup> The COE classifies middle-skill jobs as the following:

- All occupations that require an educational requirement of some college, associate degree or apprenticeship;
- All occupations that require a bachelor’s degree, but also have more than one-third of their existing labor force with an educational attainment of some college or associate degree; or
- All occupations that require a high school diploma or equivalent or no formal education, but also require short- to long-term on-the-job training where multiple community colleges have existing programs.

**Demand:**

- **Supply Gap Criteria** – Over the next five years, there is projected to be **792 jobs available annually** in the region due to retirements and workers leaving the field, **which is more than the 707 awards conferred annually** by educational institutions in the region.
- **Living Wage Criteria** – In Los Angeles County, all four occupations have entry-level wages **above** the self-sufficiency standard wage (\$18.10/hour).<sup>2</sup>
- **Educational Criteria** –The Bureau of Labor Statistics (BLS) lists an **associate degree** as the **typical entry-level education** for each of the four occupations in this report.
  - National-level educational attainment data indicates that **between 51% and 57% of workers in the field have completed some college or an associate degree.**

**Supply:**

- Between 2017 and 2020, **21 community colleges** in the LA/OC region issued awards in programs that have historically trained for the occupations of interest, conferring an average of **695 awards**.
- Between 2016 and 2019, one non-community college institution conferred an average of **12 awards in a relevant program**.

---

Self-Sufficiency Standard wage data was pulled from The Self-Sufficiency Standard Tool for California on 1/21/2022. For more information, visit: <http://selfsufficiencystandard.org/california>.

## Occupational Demand

Exhibit 1 shows the five-year occupational demand projections for the four occupations of interest. In Los Angeles/Orange County, the number of jobs related to these occupations is projected to decrease by 3% through 2025. However, there will be nearly 800 job openings per year through 2025 due to retirements and workers leaving the field.

*This report includes employment projection data by Emsi which uses EDD information. Emsi's projections are modeled on recorded (historical) employment figures and incorporate several underlying assumptions, including the assumption that the economy, during the projection period, will be at approximately full employment. To the extent that a recession or labor shock, such as the economic effects of COVID-19, can cause long-term structural change, it may impact the projections. At this time, it is not possible to quantify the full impact of COVID-19 on projections of industry and occupational employment. Therefore, the projections included in this report do not take the full impacts of COVID-19 into account.*

**Exhibit 1: Occupational demand in Los Angeles and Orange Counties<sup>3</sup>**

Geography	2020 Jobs	2025 Jobs	2020-2025 Change	2020-2025 % Change	Annual Openings
Los Angeles	5,812	5,575	(237)	(4%)	489
Orange	3,445	3,439	(6)	0%	303
<b>Total</b>	<b>9,257</b>	<b>9,014</b>	<b>(243)</b>	<b>(3%)</b>	<b>792</b>

## Wages

The labor market endorsement in this report considers the hourly wages for the four occupations of interest in Los Angeles County, as they relate to the county's self-sufficiency standard wage. Orange County wages are included below in order to provide a complete analysis of the LA/OC region. Detailed wage information, by county, is included in Appendix A.

**Los Angeles County** — All four occupations of interest have entry-level wages **above** the self-sufficiency standard wage for one adult (\$18.10 in Los Angeles County). Typical entry-level hourly wages are in a range between \$22.47 and \$26.83, while experienced workers typically earn between \$36.66 and \$42.90 per hour.

**Orange County** — All four occupations of interest have entry-level wages **above** the self-sufficiency standard wage for one adult (\$20.63 in Orange County). Typical entry-level hourly wages are in a range between \$23.41 and \$27.73, while experienced workers typically earn between \$37.92 and \$44.49 per hour.

---

<sup>3</sup> Five-year change represents new job additions to the workforce. Annual openings include new jobs and replacement jobs that result from retirements and separations.

## Job Postings

Over the past 12 months, there have been 3,858 online job postings related to the four occupations of interest. The highest number of job postings were for maintenance technicians, CAD drafters, architectural drafters, CAD operators, mechanical designers, and industrial maintenance technicians. The top skills were Computer Aided Drafting/Design (CAD), repair, machinery, Revit, SolidWorks, shop drawings, and 3D modeling/design. The top employers, by number of job postings, in the region were Northrop Grumman, Actalent, Peak Technical Services, and HCI Systems.

*It is important to note that the job postings data included in this section reflects online job postings listed in the past 12 months and does not yet demonstrate the full impact of COVID-19. While employers have generally posted fewer online job postings since the beginning of the pandemic, the long-term effects are currently unknown.*

## Educational Attainment

The Bureau of Labor Statistics (BLS) lists an associate degree as the typical entry-level education for each occupation in this report. National-level educational attainment data indicates that between 51% and 57% of workers in the field have completed some college or an associate degree.

## Educational Supply

**Community College Supply** — Exhibit 2 shows the annual and three-year average number of awards conferred by community colleges in programs that have historically trained for the occupations of interest. The colleges with the most completions in the region are Mt. San Antonio, East LA, and Cerritos.

**Exhibit 2: Regional community college awards (certificates and degrees), 2017-2020**

**Non-Community College Supply** — For a comprehensive regional supply analysis, it is important to consider the supply from other institutions in the region that may provide training programs for the occupations of interest. Exhibit 3 shows the annual and three-year average number of awards by program and institution. Due to different data collection periods, the most recent three-year period of available data is from 2016 to 2019. Between 2016 and 2019, non-community college institutions in the region conferred an average of 12 awards.

**Exhibit 3: Regional non-community college awards, 2016-2019**

<b>CIP Code</b>	<b>Program</b>	<b>Institution</b>	<b>2016-17 Awards</b>	<b>2017-18 Awards</b>	<b>2018-19 Awards</b>	<b>3-Year Average</b>
