The San Diego & Imperial Center of Excellence (COE) developed this brief to assist the region’s community colleges with strategic planning and program development. *Industrial Automation Occupations* include “Electrical and Electronic Engineering Technologists and Technicians,” “Electro-Mechanical and Mechatronics Technologists and Technicians,” “Mechanical Engineering Technologists and Technicians,” “Industrial Machinery Mechanics,” and “Maintenance and Repair Workers, General.” According to available data, *Industrial Automation Occupations* in Imperial County have a labor market demand of 80 annual job openings (while average demand for a single occupation in Imperial County is 13 annual job openings), and one institution supplies 30 awards for these occupations, suggesting that there is a supply gap in the labor market. Employers historically reported to the California Employment Development Department (EDD) and U.S. Bureau of Labor Statistics (BLS) that on average *Industrial Automation Occupations* earned entry-level earnings of \$26.66 per hour, which is above the living wage in Imperial County. Comparatively, recent online job postings (2021-2023) show median earnings between \$19 to \$25 per hour. This brief recommends proceeding with developing a new program or modifying an existing program because there is a supply gap in the region, entry-level wages pay above the living wage, and only one institution supplies awards in Imperial County. However, colleges should note that the typical entry-level education for these occupations is a high school diploma or equivalent, or less.

Introduction

This report provides labor market information in Imperial County for the following occupational code in the Standard Occupational Classification (SOC)¹ system:

- **Electrical and Electronic Engineering Technologists and Technicians (SOC 17-3023):** Apply electrical and electronic theory and related knowledge, usually under the direction of engineering staff, to design, build, repair, adjust, and modify electrical components, circuitry, controls, and machinery for subsequent evaluation and use by engineering staff in making engineering design decisions.
- **Electro-Mechanical and Mechatronics Technologists and Technicians (SOC 17-3024):** Operate, test, maintain, or adjust unmanned, automated, servomechanical, or electromechanical equipment. May operate unmanned submarines, aircraft, or other equipment to observe or record visual information at sites such as oil rigs, crop fields, buildings, or for similar infrastructure, deep ocean exploration, or hazardous waste removal. May assist engineers in testing and designing robotics equipment.
- **Industrial Machinery Mechanics (SOC 49-9041):** Repair, install, adjust, or maintain industrial production and processing machinery or refinery and pipeline distribution systems. May also install, dismantle, or move machinery and heavy equipment according to plans.
- **Maintenance and Repair Workers, General (SOC 49-9071):** Perform work involving the skills of two or more maintenance or craft occupations to keep machines, mechanical equipment, or the structure of a building in repair. Duties may involve pipe fitting; HVAC maintenance; insulating; welding; machining; carpentry; repairing electrical or mechanical equipment; installing, aligning, and balancing new equipment; and repairing buildings, floors, or stairs.
- **Mechanical Engineering Technologists and Technicians (SOC 17-3027):** Apply theory and principles of mechanical engineering to modify, develop, test, or adjust machinery and equipment under direction of engineering staff or physical scientists.

For the purpose of this report, these occupations are referred to as *Industrial Automation Occupations*.

³ Traditional LMI is generally historical data captured by the U.S. Bureau of Labor Statistics (BLS) or the California Employment Development Department (EDD). It does not account for recent technological, economic, or legislative changes that may affect labor market demand and wages.

⁴ Lightcast 2024.03; QCEW, Non-QCEW, Self-Employed.

On average, the entry-level hourly earnings are \$26.66—or \$55,452 annual salary⁵; this is more than the living wage for a single adult in Imperial County, which is \$15.11 per hour (Exhibit 3).⁶

Exhibit 3: Hourly Earnings⁷ for Industrial Automation Occupations in Imperial County⁸

Between January 1, 2021 and December 30, 2023, employers advertised between \$19 to \$25 per hour in online job postings for *Industrial Automation Occupations* in Imperial County (Exhibit 4).⁹ This suggests that employers in recent years are increasing wages due to labor market forces that may not be captured by traditional LMI.

Exhibit 4: Median Advertised Salaries in Online Job Postings for Industrial Automation Occupations in Imperial County (2021-2023)

⁵ Annualized salaries assume a full-time position with 2,080 hours. Multiplying the hourly wage with 2,080 yields the annual salary.

Demand vs. Supply

Comparing labor demand (annual openings) with labor supply¹⁵ suggests that there is a **supply gap** for these occupations in Imperial County, with **80** annual openings and **30** awards. Comparatively, there are **21,828** annual openings in California and **3,053** awards, suggesting that there is a **supply gap** across the state¹⁶ (Exhibit 9).

Exhibit 9: Labor Demand (Annual Openings) Compared with Labor Supply (Average Annual Awards)

	Demand (Annual Openings)	Supply (Annual Awards)	Supply Gap or Oversupply
Imperial	80	30	50
California	21,828	3,053	18,775

Please note: This is a basic analysis of supply and demand of labor. The data does not include workers currently in the labor force who could fill these positions or workers who are not captured by publicly available data. This data should be used to discuss the potential gaps or oversupply of workers; however, it should not be the only basis for determining whether or not a program should be developed.

¹⁵ Labor supply can be found from two different sources: Lightcast or the California Community Colleges Chancellor's Office MIS Data Mart. Lightcast uses CIP codes while MIS uses TOP codes. Different coding systems result in differences in the supply numbers.

Online Job Postings

This report analyzes not only historical and projected (traditional LMI) data, but also recent data from online job postings (real-time LMI). Online job postings may provide additional insight about recent changes in the labor market that are not captured by historical data. Between 2020 and 2023, there was an average of 88 online job postings per year for *Industrial Automation Occupations* in Imperial County (Exhibit 12). Please note that online job postings do not equal labor market demand; demand is represented by annual job openings (see Exhibit 1). While this brief includes online jobs postings data to help with curriculum development, the community colleges should note that this type of data is impacted by several variables: employers may post a position multiple times to increase the pool of applicants; a job posting can remain posted after a business decides not to fill a position; or an employer may use one posting to fill multiple positions, for example.
