CAUTION: This email originated outside SMC.

Good morning Karol,

Attached, please find a regional labor market analysis for your **Chemical Technician** exploratory request. In your request, you listed **0955.00 Laboratory Science Technology** as the TOP code, but we went with the TOP code most closely aligned with the target occupation, **0954.00 – Chemical Technology**. If this presents any problems on your end, please let me know.

This program area meets the threshold for endorsement from a labor market perspective, primarily due to the lack of related programs in the region. So, if you choose to move forward with creating this program, you may use this same report as long as it is completed by October 2025.

If you have any questions or need anything else, please do not hesitate to reach out.

Thank you,
Luke
